Universe: Total population

2006-2010 American Community Survey Selected Population Tables

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

	San Francisco County, California	
	Italian (030-031, 051-074)	
	Estimate	Margin of Error
Total:	38,870	+/-1,887
Male:	19,750	+/-1,258
Under 5 years	744	+/-182
5 to 9 years	484	+/-175
10 to 14 years	341	+/-133
15 to 17 years	385	+/-135
18 and 19 years	235	+/-129
20 years	81	+/-65
21 years	127	+/-87
22 to 24 years	726	+/-227
25 to 29 years	2,408	+/-349
30 to 34 years	2,378	+/-286
35 to 39 years	2,124	+/-320
40 to 44 years	1,838	+/-291
45 to 49 years	1,663	+/-321
50 to 54 years	1,488	+/-269
55 to 59 years	1,447	+/-232
60 and 61 years	457	+/-123
62 to 64 years	511	+/-114
65 and 66 years	354	+/-128
67 to 69 years	265	+/-93
70 to 74 years	438	+/-137
75 to 79 years	325	+/-132
80 to 84 years	381	+/-114
85 years and over	550	+/-157
Female:	19,120	+/-1,121
Under 5 years	970	+/-265
5 to 9 years	484	+/-142
10 to 14 years	314	+/-104
15 to 17 years	234	+/-84
18 and 19 years	394	+/-144
20 years	96	+/-75
21 years	254	+/-131
22 to 24 years	1,271	+/-263
25 to 29 years	2,882	+/-454

	San Francisco County, California	
	Italian (030-031, 051-074)	
	Estimate	Margin of Error
30 to 34 years	2,139	+/-315
35 to 39 years	2,031	+/-323
40 to 44 years	1,374	+/-271
45 to 49 years	944	+/-183
50 to 54 years	896	+/-215
55 to 59 years	1,006	+/-210
60 and 61 years	416	+/-125
62 to 64 years	501	+/-156
65 and 66 years	264	+/-87
67 to 69 years	268	+/-95
70 to 74 years	443	+/-136
75 to 79 years	388	+/-118
80 to 84 years	560	+/-133
85 years and over	991	+/-200

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
